SUMMARY

Motivated final-year IT student with CGPA 8.25 and real-world internship experience. Proficient in Object-Oriented Programming, and Agile-based software development. Worked on projects in Java, Python, Machine Learning, and Web Development. Skilled in problem solving, debugging, and building AI-powered applications using prompt engineering. Looking for a fresher Software Developer role where I can contribute across the full Software Development Life Cycle (SDLC).

EDUCATION

Pravara Rural Engineering College	2022 – 2026
<i>Bachelor of Engineering – Information Technology</i>	<i>CGPA: 8.25 / 10 (up to 7th Semester)</i>
Kukadi Valley Public School and Jr. College	2022
<i>Higher Secondary Certificate (HSC) – CBSE</i>	88.60%
Kukadi Valley Public School and Jr. College	2020
<i>Secondary School Certificate (SSC) – CBSE</i>	85%

TECHNICAL SKILLS

Languages: Java, Python, MySQL, JavaScript
Web Technologies: HTML, CSS, React.js, REST API, Flexbox, Bootstrap
Libraries: Pandas, NumPy, Scikit-learn, Matplotlib
Tools & Platforms: Git, GitHub, Postman, VS Code, Jupyter Notebook, PyCharm, IntelliJ IDEA, Unix/Linux Basics
AI & Emerging Tech: Prompt Engineering, Claude API, AI-Powered App Development, AI Tools (ChatGPT, Claude, Copilot)
Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), SDLC, Agile Methodology, Machine Learning, Debugging
Soft Skills: Problem Solving, Communication, Time Management, Project Management

EXPERIENCE

Data Science & Machine Learning Intern	Dec 2024 – Jan 2025
<i>Maxgen Technologies Pvt. Ltd.</i>	<i>Pune</i>
– Performed data preprocessing, feature engineering, and model evaluation on real-world datasets following Agile workflows. – Developed a machine learning-based Gold Price Prediction system using Python and data analysis techniques.	

PROJECTS

- Expense Tracker (AI-Powered)** | *Claude API, Prompt Engineering, Kotlin*
- Built a fully functional expense tracking application powered by the Claude AI API.
 - Leveraged prompt engineering techniques to generate intelligent spending insights and automated categorization.
- Gold Price Prediction using Machine Learning** | *Python, Scikit-learn, Pandas, Jupyter Notebook*
- Built and optimized a Gold Price Prediction system achieving 89% model accuracy through data preprocessing and ML model tuning.
 - Applied data preprocessing, feature selection, and cross-validation to improve prediction accuracy; documented results in Jupyter Notebook.
- Bank Management System** | *Java, OOP, MySQL, SQL*
- Built a full-featured Java application to manage customer accounts and transactions using OOP and modular architecture.
 - Integrated MySQL for persistent backend storage; implemented CRUD operations and enforced data consistency.
- Distributed File System** | *Java, HTML, CSS, JavaScript*
- Developed a Distributed System project using AI-assisted development with Anthropic's Claude and implemented core backend functionalities.
 - Applied Multithreading and File Handling in the backend; performed debugging to resolve concurrency issues.
- Automated Lighting System (IoT – LDR Project)** | *Hardware, Sensor Integration*
- Designed a Light Dependent Resistor (LDR) based system to auto-control light intensity.
 - Developed an automated LDR-based system using Arduino and sensors for intelligent light detection and control.

EXTRA-CURRICULAR & LEADERSHIP

- Mentored peers in Python programming and Data Structures and Algorithms during academic lab sessions, improving overall team output.
- Represented college football team in inter-college tournaments – demonstrated teamwork, leadership, and performance under pressure.
